

Abdulrahman Kamal

Computer Science Graduate | Software Engineering | Applied AI | Data Integration

Abu Dhabi, UAE • +971 56 629 4551 • abdshawki@gmail.com • LinkedIn: abdulrahman-kamal04 • Portfolio
UAE Golden Visa Holder

// Professional Summary

Computer Science graduate with hands-on experience in software development, applied AI, and system integration. Contributed to full-stack and AI-enabled applications using Python, React, Node.js, PostgreSQL, TensorFlow, and REST APIs, with internship experience in requirements gathering, functional testing, AI workflows, and stakeholder collaboration. Able to contribute across application development, integration, testing, and technical problem-solving while continuing to grow as a software engineer.

// Technical Skills

Programming: Python, Java
Web Development: React, Node.js, Express.js, Flask
AI & Data: TensorFlow, Keras, Prompt Engineering
Databases & Tools: PostgreSQL, MySQL, Git, Excel

// Core Competencies

Software: REST APIs, Functional Testing, RBAC
Analysis: Requirements Gathering, Process Analysis
AI Applications: Agentic AI, AI Workflow Configuration

// Experience

Abu Dhabi Department of Economic Development (ADDED)

Jun 2026 – Jul 2026 (2 mos.)

AI & Data Analysis Intern

Abu Dhabi, UAE

- > Gathered requirements and defined functional specifications for 4 department-specific AI agents on an enterprise Agentic AI platform, partnering with business stakeholders across departments.
- > Configured dashboards and KPI cards, and engineered prompts for AI-driven evaluations, partnering with an AI Engineer to implement scoring logic and business rules.
- > Executed functional testing (CRUD, RBAC, workflow validation) across staging and production, and supported deployment and data validation using Excel and Python.

Alpha Data

May 2025 – Jul 2025 (2 mos.)

Cybersecurity / SOC-NOC Intern

Abu Dhabi, UAE

- > Monitored security logs to detect abnormal network activity and support SOC/NOC incident response team.

// Education

Bachelor of Science in Computer Science

Aug 2022 – Jun 2026

American University of Ras Al Khaimah, School of Engineering and Computing

Ras Al Khaimah, UAE

ABET-Accredited • QS 5 Stars Plus, Top 500 (2025) • SACSCOC & QAA Accredited

// Publications

- > Kamal, A. R., et al. “A Hybrid Autoencoder–Random Forest Defense with Reconstruction Gating Against Adversarial Evasion in Intrusion Detection Systems.” ICERAI Conference, 2025 (co-author).

// Projects

Plant Health Monitoring System

May 2026

Python, TensorFlow, Keras, MobileNetV2, Flask — Senior Design Project (Team of 6)

- > Collaborated with AI students on a MobileNetV2-based plant disease classification project.
- > Focused on the software and model-integration side of the project, working with the trained model inside a Flask application.
- > Helped connect leaf-image input, model inference, and prediction output into an end-user workflow.

Smart Cafeteria Ordering System

Dec 2025

React, Node.js, Express.js, PostgreSQL — Team Project (Team of 6)

GitHub: AURAKs-Dine

- > Contributed to a full-stack cafeteria pre-ordering platform built with React, Node.js, Express, and PostgreSQL.
- > Worked on the role-based staff CMS for managing menu items and product images, including modal interfaces and user feedback notifications.
- > Supported application deployment using Render and Neon PostgreSQL, including environment-variable and database configuration.

// Certifications

- > **Foundations: Data, Data, Everywhere** — Google Jul 2026
- > **Agentic AI and AI Agents: A Primer for Leaders** — Vanderbilt University Jun 2026
- > **AI Infrastructure and Operations Fundamentals** — NVIDIA Jun 2025

// Languages

- > Arabic — Native | English — Fluent
